ADITYA ARAKERI

Looking to work in London, open to relocation | +44 7922 665669 | aadityaarakeri12@gmail.com | linkedin.com/in/aditya-arakeri

PROFILE

Finance graduate with an MSc in Financial Technology and a BBA, looking for an analyst role in London. My studies covered corporate finance, investment analysis, portfolio theory and financial statement analysis, and I hold the Bloomberg Market Concepts certification, so I am at home with markets, risk and how businesses are valued. I back that up with practical data skills in Excel and Python, which I used to analyse survey data for my dissertation on crypto investors. Quick to learn and settle into a team.

EDUCATION

MSc Financial Technology (FinTech), University of Birmingham *09/2025 - 09/2026*

- Modules included Corporate Finance, Portfolio Theory and Investment Analysis, Big Data Management in Finance, Private Equity and Venture Finance, Blockchain, and Programming for Data Science.
- Dissertation on novice cryptocurrency investors, using reliability testing, correlation and multiple regression on survey data, with findings written up for readers without a statistics background.

Bachelor of Business Administration (BBA), Jain University, Bengaluru *06/2021 - 06/2024*

- Studied financial management, investment analysis, management accounting, financial statement analysis, business strategy and operations.

CERTIFICATIONS

- Bloomberg Market Concepts (BMC), Bloomberg (10/2026). Covers economic indicators, currencies, fixed income and equity markets.
- Big Data, Artificial Intelligence, and Ethics, University of California, Davis (Coursera) (01/2025). Covers how big data and AI are used in decision-making, and the privacy, bias and accountability questions they raise.

PROJECTS

Novice Crypto Investor Study (MSc Dissertation) *2026*

- Ran a survey of novice cryptocurrency investors and tested the results using reliability testing, correlation and multiple regression.
- Looked into responses that didn't fit the pattern before drawing conclusions and then wrote up the findings in plain language for a non-technical reader.

AI Risk-Scoring Simulator (Self-Directed Project, Python, Claude API) *2026*

- Built a Python tool using the Claude API that scores synthetic loan applications for credit risk and writes a plain-English explanation for each high-risk case.

Open Government Data Analysis (Independent Project, Python) *2026*

- Cleaned, analysed and charted a public dataset from start to finish in a Jupyter Notebook, using Python, Pandas, NumPy and Matplotlib.

SKILLS

Financial services: digital assets and blockchain, credit risk basics, corporate finance, investment analysis, portfolio theory, financial statement analysis, Bloomberg Terminal.

Data analysis: Python (Pandas, NumPy, Matplotlib), Microsoft Excel, data cleaning and validation, regression and correlation analysis, reporting findings to non-technical readers.

AI and automation: building AI agents with Claude and Claude Code to automate repetitive work, for example an agent that scans job-alert emails each day and logs new roles.

Other: attention to detail, written communication, stakeholder management.

RIGHT TO WORK

Full right to work in the UK on the Graduate visa (24 months), with no restriction on hours. No sponsorship needed to start.
